

T. Devashish Pillay

Full-Stack Developer | Fintech & AI Systems | B.Tech CSE (2026) | IEEE Published Author

+91 7499223329 | devashishpillay777@gmail.com | github.com/MrDevashish-777 | linkedin.com/in/devashish-pillay | Nagpur, India

PROFESSIONAL SUMMARY

Final-year B.Tech CSE student (GPA 8.58/10) and IEEE-published researcher with production experience building fintech systems at Planitt Solutions. Developed a live crypto trading bot (Binance + FastAPI + PostgreSQL), an AI stock intelligence platform (Next.js + LLaMA 3), and an algorithmic trading engine for Indian equity markets with SMC indicators and ML candle prediction. Co-authored a peer-reviewed IEEE paper on hybrid biometric authentication achieving 99.99% accuracy. Strong across the full stack — Python, TypeScript, React, Node.js — with a track record of shipping real deployments, not just demos.

IEEE PUBLICATION

A Hybrid Identity Authentication System Using Deep Learning for Biometric and Facial Recognition

2025 IEEE International Conference on Recent Advances in Computing and Systems (REACS) | Dec 19–20, 2025, Gwalior, India | DOI: 10.1109/REACS67479.2025.11413278

- Proposed a multimodal fusion system combining facial recognition (DeepFace/ResNet50/MobileFaceNet) and fingerprint verification (HOG + Cosine Similarity), achieving 99.99% accuracy — outperforming unimodal baselines.
- Security layer integrates AES-256 encryption, SHA-256 hashing, and blockchain-based audit logging to resist spoofing and tampering. Applications span banking, healthcare, e-governance, and digital identity.
- Published in IEEE Xplore (March 2026); co-authored with researchers from S.B. Jain Institute of Technology, Management & Research, Nagpur.

EXPERIENCE

Software Development Intern | Planitt Solutions Pvt. Ltd. | Remote / Nagpur Jan 2025 – Present

- Built a production crypto trading bot in Python: Binance WebSocket + historical data ingestion, 7+ strategy plugins (RSI, MACD, Bollinger squeeze, Ichimoku, Supertrend, VWAP), FastAPI endpoints with health checks, deployed on Render backed by PostgreSQL + Redis.
- Developed Planitt Market Analyzer — AI stock intelligence platform using Next.js 15, LLaMA 3 (local inference via Ollama), TradingView widgets, Drizzle ORM + PostgreSQL. Features real-time candlestick charts, news sentiment analysis, stock screener, and a sector heatmap.
- Built Indian Trader v4.0 for NSE/BSE: Smart Money Concepts (order blocks, FVGs, S/R detection), multi-timeframe signals, Transformer-based candle direction prediction model, and Dash/Plotly analytics dashboard.
- Developed P-L-Viewer — a Google Sheets → Firestore sync engine (Node.js) with row-hash-based change detection, batched upserts, and an Expo React Native mobile viewer; agreement PDF export to Google Drive via service account.
- Built Bhav App — cross-platform Expo (iOS/Android/Web) app with Razorpay + Apple IAP payment integration, Socket.IO real-time updates, Zustand state management, and EAS build/deploy pipeline.
- Maintained Docker + Kubernetes manifests, Alembic DB migrations, structured logging, mypy/ruff/black code quality pipelines, and pytest test suites across Python services.

Full-Stack Web Developer Intern | TARS Technologies | Nagpur 2024 (30 days)

- Designed REST and GraphQL APIs with JWT auth and role-based authorization (Passport.js); built React UI components; worked with MongoDB and PostgreSQL; wrote Jest unit/integration tests.

Live Project Member | Crypto Forensic Technology (CFT) | Nagpur Present

- Contributing to BioSecure — a biometric security system with React + Material-UI frontend, secure authentication flows, and real-time data handling.

Web Development Intern | HOTIT Institute Pvt. Ltd. | Nagpur 2024

- Built and maintained responsive web applications focused on performance and usability.

Website Manager | Jain International School | Nagpur Aug 2023 – Apr 2024

- Managed school website via cPanel; delivered UI/UX improvements and feature additions on request.

PROJECTS

Crypto Trading Bot — *Python, FastAPI, PostgreSQL, Redis, SQLAlchemy, Docker, Kubernetes*

- Production framework: Binance real-time + historical ingestion, 10+ indicators (EMA, RSI, MACD, ATR, Ichimoku, Supertrend, VWAP), 7 pluggable strategy modules, signal engine with TP/SL and risk controls.
- Deployed on Render; Next.js admin dashboard on Netlify; Alembic migrations, structured logging, full pytest coverage. Docker + Kubernetes manifests for containerized deployment.

Planitt Market Analyzer — *Next.js 15, TypeScript, LLaMA 3 (Ollama), PostgreSQL, Drizzle ORM, TradingView, Docker*

- AI-driven financial intelligence platform with conversational interface — local LLM inference (no external API dependency). Live TradingView charts, deep financial metrics, AI news sentiment, stock screener, forex/bonds monitoring.

Indian Trader v4.0 — *Python, Dash/Plotly, FastAPI, scikit-learn, Transformers, yfinance, NSE*

- NSE/BSE algorithmic suite: classic indicators + SMC (order blocks, FVGs), multi-timeframe signal cross-checking, Transformer ML candle prediction, Modern Portfolio Theory optimizer, REST API.

P-L-Viewer — *Node.js, Firestore, Expo (React Native), TypeScript, Google Drive API*

- Lightweight CSV-to-Firestore sync pipeline with SHA-256 row hashing (skip unchanged rows), batched upserts, audit logs, and a mobile viewer (Expo) for per-user portfolio inspection. Agreement signing with PDF export to Google Drive.

Bhav App — *Expo, React Native, TypeScript, Zustand, Socket.IO, Razorpay, Apple IAP, EAS*

- Cross-platform (iOS/Android/Web) fintech app with in-app purchases (react-native-iap), Razorpay Android payments, real-time socket updates, EAS build pipeline, and Vercel web deployment.

QRDine — *Next.js 16, Express 5, MongoDB, Socket.IO, Cloudinary, JWT*

- QR-based cafe ordering platform with 5 role surfaces (customer, waiter, kitchen, admin, super-admin), real-time order broadcasting via Socket.IO, Cloudinary media uploads, CSV bulk menu import, and multi-cafe analytics.

Sakura Dream — Visual Novel Game — *Phaser 3, Vite, JavaScript, Netlify*

- Browser-based anime visual novel with 9 branching endings, typewriter text effect, dynamic character routes, JSON-configurable story system, atmospheric music, and SPA deployment on Netlify.

CodeFlex (IEEE SBJITMR Website) — *React, JavaScript*

- Event management platform for IEEE SBJITMR chapter: authentication, dynamic content loading, responsive design, and state management across event registration flows.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript

Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS3, Expo (React Native), Framer Motion, Radix UI, Phaser 3

Backend: Node.js, Express.js, FastAPI, NestJS, GraphQL, REST APIs, WebSockets, Socket.IO

Databases: PostgreSQL, MongoDB, Firestore, Redis, Firebase, Supabase, SQLAlchemy, Drizzle ORM, Alembic

AI / ML: scikit-learn, Transformer models, LLaMA 3 (Ollama), Vercel AI SDK, DeepFace, ResNet50, HOG

Payments: Razorpay, Apple IAP (react-native-iap), Stripe (familiar)

DevOps & Tools: Docker, Kubernetes, Git, GitHub, Render, Netlify, Vercel, EAS (Expo), Cloudinary, Google Drive API

Standards & Practices: JWT Auth, RBAC, AES-256 encryption, SHA-256 hashing, TDD (pytest/Jest), mypy, ruff, black

EDUCATION

B.Tech — Computer Science & Engineering | S.B. Jain Institute of Technology, Management & Research, Nagpur
2022 – 2026 | GPA: 8.58 / 10

HSC (Class XII) — Maharashtra State Board | Nirala Junior College, Nagpur
Completed March 2022 | 77.5%

SSC (Class X) — CBSE Board | Sri Chaitanya Techno School, Vijayawada
Completed July 2020 | 88.6%

CERTIFICATIONS, RESEARCH & LEADERSHIP

- IEEE Publication — DOI: 10.1109/REACS67479.2025.11413278 (Published March 2026, IEEE Xplore)
- NPTEL 2024 — Design and Analysis of Algorithms (IIT-backed certification)
- Technical Head — IEEE SBJITMR Student Chapter (2023–24): Led technical workshops and engineering events.
- Vice President — Neev Forum, SBJITMR (2022–23): Drove community-building and inter-college collaborations.
